

Graduation Rates: Newhouse Master's Programs

The tables below indicate the graduation rates for each of the Newhouse Master's degree programs. Most programs are twelve to fourteen months long, including two or more summer sessions. An academic year is measured differently than a calendar year. A program which begins in one summer and ends in different summer is considered to span more than one academic year, although it may be one calendar year in length. Program variations are explained in the notes.

Initial Cohort indicates the summer session in which the program begins. Data for the most recent six years is displayed from the last report available from the Office of Institutional Research using data from September 30, 2020.

PUBLIC RELATIONS MASTER’S PROGRAM

A portion of the Public Relations cohort is in a two-year joint degree program with the Maxwell School of Citizenship and Public Affairs. The numbers below reflect an average of the program for singly enrolled Public Relations students and for students in the joint program. Students in the one-year Public Relations program earn a single master’s degree. Students in the two-year joint program earn two degrees, one in Public Relations and one in International Relations. Since the joint program students take classes in both their master’s programs each semester, the Public Relations degree for this group takes longer than a year to complete.
